

Sustainability Report Assurance

DELVING DEEPER

SGS

Navigating the reporting landscape

ENSURING CREDIBLE SUSTAINABILITY REPORTS

1

The rising demand for sustainability reports highlights the necessity to verify ESG data, safeguarding trust with customers and investors.

SGS

Amid global greenwashing concerns, stakeholders seek credible sustainability reports from companies.

2

The challenge

**RISING GLOBAL GREENWASHING: A
CONCERN FOR INVESTORS AND
STAKEHOLDERS**

SGS

Solution

SUSTAINABILITY REPORT ASSURANCE

3

Companies can enhance ESG information credibility with independent third-party verification, known as Sustainability Report Assurance.

SGS

ESG data, including carbon emissions, energy and water use, health, and safety, are rigorously verified against assurance standards to prevent greenwashing accusations and boost stakeholder trust.

4

What can be verified?

**VERIFIED DATA: CARBON EMISSIONS,
ENERGY, WATER, HEALTH & SAFETY
AND MORE; VERIFICATION OF
PROCESSES AND CONTROLS**

SGS

Assurance Standards

LEADING THE WAY: DOMINANT ASSURANCE
STANDARDS - AA1000 & ISAE3000

5

AA1000 and ISAE3000 are the assurance standards used to conduct assurance engagement

SRA brings advantages like bolstered trust, enhanced transparency in sustainability reports, improved stakeholder reputation, safeguarding against greenwashing allegations, and attracting investors.

6

Benefits of Sustainability Report Assurance

BUILDING TRUST, AVOIDING GREENWASHING ACCUSATIONS, AND ENHANCING REPUTATION

SGS

Partner with SGS.

Our dedicated team of lead auditors are skilled in sustainability assurance, including AA1000, ISAE 3000, KPI verification as per GRI Standards, BRSR Core requirements and GHG verification as per ISO 14064 and GHG Protocol.
